Product Details

Location, Location, Location! How many times have you heard that? We help small businesses get that possibility through adding a storefront on the busiest street in your area! If you could open another store on the busiest street for just a few hundred dollar investment would you do it? This would include sales staff too! With our automated attendant we can accomplish that for you.

Social Media Visibility

Get more followers on your business Facebook page. We can build prospective customers from users' interaction with your facebook page and instagram. We help you re engage customers and market your products!

Sales Assistant

Our automated sales assistant can make the purchase process simple, and keep them engaged through the process. Just like a salesperson in your store, the automated assistant, can remind and walk a customer through the purchase transactions and can be completed right in messenger.

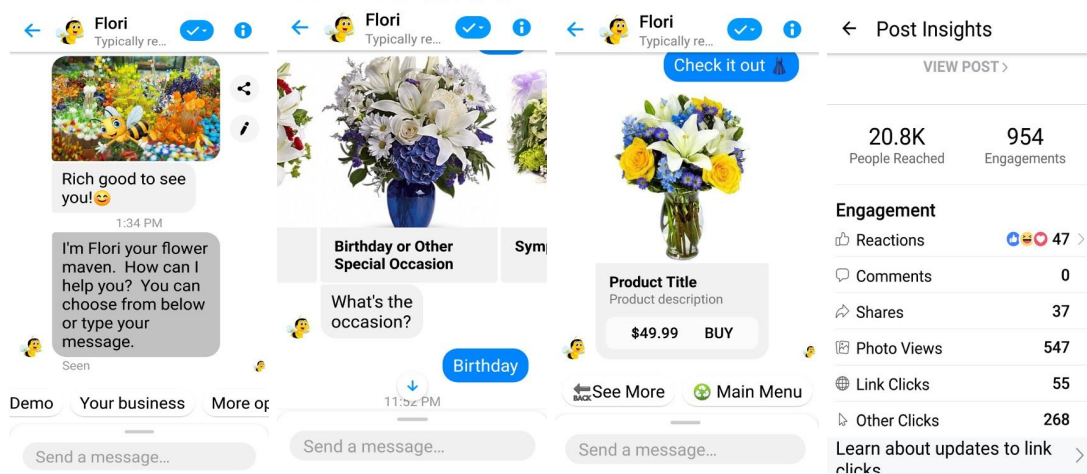

Advertising Campaigns

We help develop the right target market. We can also advise you how to market your business virally so you can get some free advertising and build your traffic.

Chatbot for your website

To integrate all of your store fronts we provide you with the ability to put your automated assistant on your website.

Personal Shopper Screen Shot

Here is a sample of a florist shop. Flori takes you on a tour and recommends products based on the answers you give. If there is a question she can not answer, then you can chat with a person from your store. The last sample shows the statistics from a post on Facebook. We help you set it up with your products, and connect to your business page on FaceBook.
