Product Details

Pricing for each product starts with the main package plus add-on plans. They include a one time setup fee, and a monthly service fee. If we develop a more robust package that can be done by an individual company's request, based on the requirements needed.

Social Media Visibility

We can build prospective customers from users' interaction with your facebook page. The automated assistant help you re engage customers and market your products!

Starting Price for basic Package

Set up fee \$500 USD and up

Monthly maintenance \$150 USD and up

Sales Assistant

Our automated sales assistant can make the purchase process simple, and keep them engaged through the process. Just like a salesperson in your

store, the automated assistant, can remind and walk a customer through the purchase transactions and can be completed right in messenger.

Starting Price for basic Package

Set up fee \$1,500 USD and up

Monthly maintenance \$150 USD and up

Advertising Campaigns

We help develop the right target market. We can also advise you how to market your business virally so you can get some free advertising and build your traffic.

Price for addon Package

Must include one of the basic Plans above

Set up fee \$250 USD and up

Monthly maintenance includes basic plan plus any added \$150 USD and up

Segmentation and re marketing campaigns

We help segment your best customers and remarket to them. We also help identify new customers with like attributes. Implement some viral techniques so you can get some free advertising and build your traffic.

Price for addon Package

Must include one of the basic Plans above

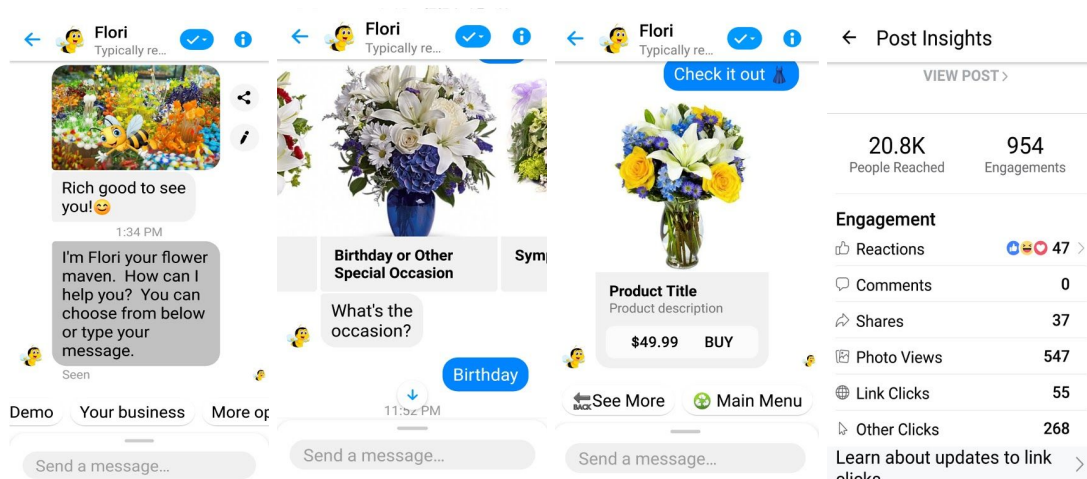

Set up fee \$250 USD and up

Monthly maintenance includes basic plan plus any added \$150 USD and up

Chatbot for your website

Free code to have your webmaster install on your website. Included with any package. To integrate all of your store fronts we provide you with the ability to put your automated assistant on your website.

Personal Shopper Screen Shot

Here is a sample of a florist shop. Flori takes you on a tour and recommends products based on the answers you give. If there is a question she can not answer, then you can chat with a person from your store. The last sample shows the statistics from a post on Facebook. We help you set it up with your products, and connect to your business page on Facebook.
